Subject: Meeting Overview, Tuesday April 16th

Hey Chem Club!

A special thank you to our wonderful guest speakers who visited us on Tuesday! We got some great information about their experiences at Sac State and after.

There were a couple of key things that we discussed at this past meeting:

Merryhill Elementary Room Setup: Thursday, **April 25. 5pm-6pm**, Sequoia **418**.

We will need to clean up the rooms a bit before our event. This cleanup will be *far* less intense than last time, but we will still need all the help we can get! We will be wiping down bench-tops again, this time only with 409 (and we will use less of it so it comes off faster!).

Merryhill Elementary Visit: Friday, **April 26. 9am – 2pm**. Sequoia **418**.

Any time you can spare to help out would be greatly appreciated! We need all the help we can get! Please remember to wear lab appropriate clothing (no tank tops, closed-*foot* shoes, and floor-length skirt/full-length jeans without holes). The event will be run in stations, with a lunch break in the middle.

Stations will be:

1. Chromatography and Melting Styrofoam Cup
2. Microwave grapes and Microwave Soap
3. Cornstarch Quicksand
4. Diaper
5. Tie-Dye Milk
6. Slime

Again, **please stop by and help out** whenever you can! We lack staff!

Club Shirts- We have decided on a t-shirt design! It will have a small logo with an Erlenmeyer on the front, and have a fancy Chemistry mural on the back!

Thanks everyone, see you next Thursday and Friday (hint hint)!
