Presented below are the lists of readings available of précis and oral presentations and the schedule listing the earliest due date for each reference. Each student must do a précis and presentation for one of the references on the list. Email me a ranked list of at least four references you would be interested in doing no later than Sunday February 5. I will give the readings in the order of the receipt of emails, and will arbitrarily assign a reading to anyone who has not sent me an email request by the due date.
