

# October 2018 Phishing Awareness Campaign

Our first PhishMe campaign was launched in October 2018. Phishing is an attempt to get you to do an action you would not normally do such as give your username and password, give money, download malicious code to your computer, or give away confidential data. Phishing by email has been a troublesome issue for our campus. We had over 800 people give up their passwords in a phishing scam that ran in late August, 2018.

The stakes are high if your credentials are stolen. It can be very costly for you and the campus. Because of this, we sent an email that mimicked a phishing attempt to all campus students, faculty, and staff. The purpose is to demonstrate what a phishing message looks like and to help you avoid serious disruptions caused by phishing.

Those who clicked the links in the message were presented with an educational video that taught them how to identify phishing.

## Signs of Phishing

Below is a graphic of the simulated phishing email sent to campus, with call-outs to alert you to the items that can help you identify a real phishing email.

The image shows a simulated phishing email. At the top left, there is a grey profile icon and the text "Account security team <accounts-noreply@webaccess-alert.com>" (call-out 1) and "Account security alert". Below this is a blue header "Security alert" (call-out 6). The main body text says "The mailbox for your account [username@csus.edu](#) has exceeded the storage limit set by your administrator." (call-out 2). Below this is a blue button that says "Recover account" (call-out 4). Underneath the button is a link: "Learn how to [manage your email account space](#)." (call-out 5). At the bottom, the signature reads "Thanks, The email account team" (call-out 3).

PHISHING EMAIL EXAMPLE

1. Not a valid Sacramento State email address ([username@csus.edu](#)).
2. The message body does not have Sacramento State branding.
3. The signature is not from a Sacramento State department.
4. If you hover over the "Recover account" button, it shows that it is not going to a Sacramento State web page.

#### PHISHING LINK EXAMPLE

5. If you hover over the "manage your account space" link, it shows that it's not going to a Sacramento State web page.

6. Does not mention Sacramento State or Information Resources and Technology (IRT) anywhere.

If you are unsure of the validity of an email or website, please contact the IRT Service Desk for assistance.

# Results of the Phishing Simulation

The simulation went out as two separate campaigns: one to students, and the second to faculty, staff, and auxiliary staff. Here are the results of the campaigns.

## Students

Emails Delivered: 40,203  
Clicked Link: 7,089

### Response Breakdown

RESULTS OF THE PHISHING SIMULATION FOR STUDENTS PIE CHART

# Faculty, Staff, and Auxiliaries

Emails Delivered:	4,788
Clicked Link:	310
Reported, only:	4
