Procedures

The Sacramento State Aquatic Center is a cooperative operation of the Associated Students, Inc. of California State University, Sacramento, The University Union of Sacramento State, California Department of Boating and Waterways, California Department of Parks and Recreation, and the Bureau of Reclamation. The center was established in 1981 and has provided instruction to thousands of students, offering such services as University kinesiology classes, leisure classes for the general public, competitive team sports, and a series of progressive summer camps and youth programs. The center was established to augment the academic curriculum at Sacramento State and is open to Sacramento State students, faculty, staff, alumni, as well as the general public. All students, faculty, staff and alumni receive a discount with their valid Sacramento State ID card. The facility occupies eight acres of land and is one of the finest in the state; its features include a beach area, picnic tables, barbeques, boat houses, classrooms, and parking. Sacramento State has an inter-state agreement with California Department of Parks and Recreation and Associated Students, Inc. to operate and manage the center. The advisory committee was created to formally communicate to respective partners

Advisory Committee Structure

Membership will include constituents from the following offices, program centers, or groups:

- Office of Vice President for Student Affairs
- Office of Vice President for Administration
- College of Health and Human Services
- Intercollegiate Athletics
- University Union
- Associated Students (2 student positions)
- Executive Director of Associated Students, Inc.
- Director of the Aquatic Center

General Operation

The Forum, chaired by the Director of the Aquatic Center, will meet at least twice a year. These meetings will consist of presentations by the Aquatic Center staff regarding its operations and long-term direction and a general discussion concerning how the needs of the Partners fit within the operations. The results of these discussions will be forwarded to the Aquatic Center Advisory Committee and considered in the development of the Center's goals and objectives. As needed by the Center, members of the Partnership Forum may be called on to consult with the Center on specific issues.

As of 11/10/08
