

COVID-19 EVENT SAFETY GUIDELINES

Events are important to our community; they create jobs, provide entertainment and keep people connected to their community. However large events, including mass gatherings, present a high risk for COVID-19 transmission.

Effective April 1, 2022, the requirement for vaccine verification or proof of negative tests for attendees at Indoor Mega Events will be lifted and will move to a **strong recommendation**.

As the CDC, Cal-OSHA, and Sacramento County health officials continue to lift COVID related mandates and restrictions, we at Sac State should prepare to go back to normal operations.

- Sac State recommends that all students, staff, faculty, and visitors be vaccinated for COVID-19. Large events pose a risk to those who are not vaccinated. After March 18th, masks are no longer required indoors. Masks and other PPE will be available to those who need or want it at the event (subject to availability).
- Changes in the COVID-19 Safety Guidelines may occur on the day of the event.
- If you are sick or experiencing symptoms of illness, please refrain from attending this event.

Conference Group Staff or Participant That Take Ill Or Contract Covid During Their Time On Campus For Summer Conferences

- If someone gets sick, and tests positive for COVID-19 they must leave campus immediately (as soon as possible, i.e. as soon as a parent/guardian can be notified and come and pick the person up, the conference organizers should have an emergency contact for each participant) after the positive test result is determined. We will not house them in quarantine on campus. The University or University Housing will not provide testing for a third-party event or conference organizers, but we will require that the organizers have the means to rapidly test their participants on-site if they are staying overnight. Should guests/staff feel ill they should isolate in room and wear mask when using restroom or around others until departing.
- Consider how they can be safely transferred from the event to appropriate transport.
- Ensure staff know what to do if an event attendee or staff member presents to them with symptoms.

Third Party Groups on Campus

COVID-19 Safety Plan is no longer required. Third parties are still responsible for following Sacramento County Public Health and the university's COVID safety guidelines for events.

Contingency Planning

- Consider what plans or actions might be taken if the situation worsens (i.e. event postponement or cancellation) and Covid-19 restrictions are tightened.
- Read License Agreement for specific language and cancellation.
